

BLUE

The IT team reported abnormal access activity on machine MARLEY .

As usual, this happened in the middle of the night, so I was promptly dragged out of bed.

A quick triage on Wazuh confirmed the suspicion: there is at least one entry that warrants further investigation. At this point, a deeper analysis is required.

If this is not a false positive, the adversary is already active within the environment.

We are therefore operating in **live response mode**, no disk acquisitions.

Infrastructure

The following table lists the servers within the scope of the incident, along with their respective domains, IP addresses, and local administrator credentials.

Host ID	Hostname	Type	Domain	Local Admin Password	IP
dc01	stohess	DC	sina.local	8dCT-DJjgScp	192.168.56.10
dc02	wallrose	DC	shiganshina.sina.local	Ngtl75cKV+Pu	192.168.56.11
srv02	trost	Server	shiganshina.sina.local	Ngtl75cKV+Pu	192.168.56.22
dc03	liberio	DC	maria.local	Ufe-bVXSx9rk	192.168.56.12
srv03	marley	Server	maria.local	978i2pF43UJ-	192.168.56.23

Access note

Apache Guacamole is available for browser-based access, but it can be unstable under load or during long live-response sessions.

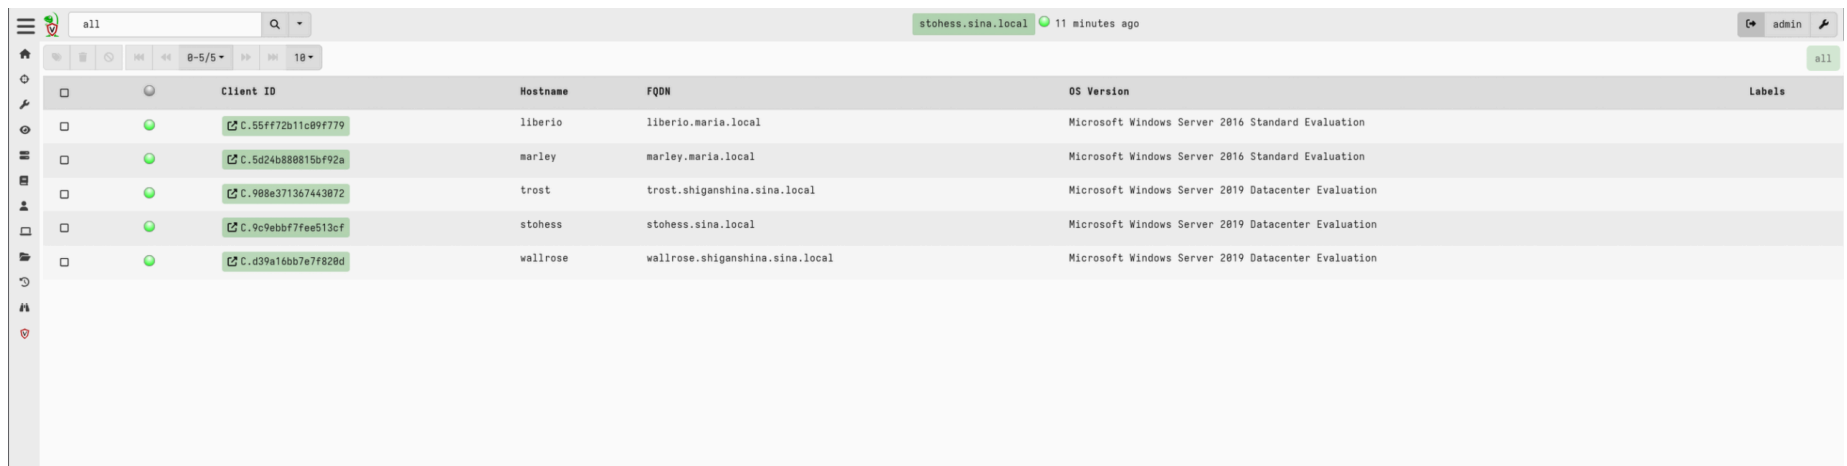

If you experience issues (latency, dropped sessions, clipboard problems), switch to **Remmina** for a more reliable RDP experience.

- **Guacamole URL:** <http://192.168.56.52:8080/guacamole/#/>
- **CREDS:** user:ohmygoadchangeme

Velociraptor

To get ahead of the situation, I pre-staged a Velociraptor server on a dedicated host inside the victim subnet, deployed according to the [official guidelines](#).

- URL: <https://192.168.56.53:8889/app/index.html#/>
- CREDS: admin:p+KfM31TTleU9.l

Client ID	Hostname	FQDN	OS Version	Labels
C.55ff72b11c89f779	liberio	liberio.maria.local	Microsoft Windows Server 2016 Standard Evaluation	
C.5d24b88815bf92a	marley	marley.maria.local	Microsoft Windows Server 2016 Standard Evaluation	
C.988e371367443872	trost	trost.shiganshina.sina.local	Microsoft Windows Server 2019 Datacenter Evaluation	
C.9c9ebbf7fee513cf	stohess	stohess.sina.local	Microsoft Windows Server 2019 Datacenter Evaluation	
C.d39a16bb7e7f828d	wallrose	wallrose.shiganshina.sina.local	Microsoft Windows Server 2019 Datacenter Evaluation	

Velociraptor will be used to support live-response activities, targeted collection, and rapid endpoint visibility without disrupting the environment.

Wazuh

The Wazuh dashboard can be used to correlate alerts, validate timelines, and monitor ongoing activity.
